LOGISTICS AND SUPPLY CHAIN MANAGEMENT

PROGRAM OBJECTIVE

Logistics & Supply Chain Management prepares students for industry certification exams and entry-level management positions in the field of supply chain management. Careers include inventory management, master resource planning, scheduling and planning, transportation logistics management, route planning, physical distribution management, transportation marketing, customer service, procurement, quality control and operations management. Typical employers include warehousing and transportation distributors, large manufacturing facilities, retail and wholesale distributors.

READY. SET. WORK.

- Goal 1:** Graduates will possess the skills necessary to obtain industry certification and entry-level positions in logistics and supply chain management areas.
- Goal 2:** Graduates will possess the appropriate skills needed for supervision, decision-making, project management, and critical thinking, allowing for advancement into supervisory positions.
- Goal 3:** Graduates will be able to recognize areas for improvement that will lead to cost reductions and provide logistical advantages over the competition.

Applicants are encouraged to arrange a campus visit and a personal information session with a Recruitment Advisor. Appointments may also be made to meet with appropriate faculty and current students.

CAREER OPPORTUNITIES

Typical employers include warehousing and transportation distributors, large manufacturing facilities, government, third party logistics, retail and wholesale distributors.
