• A lot of the online classes did not match up with what I was learning in the lab that week. The online course would be talking about one thing, then the lab would be going over something completely different than what I learned online.

7 - Are there any other comments you wish to share about online learning?

Response Rate

- Hybrid classes are more helpful than online only classes. I would like the opportunity to meet my professors/classmates in person. I find it more engaging and personable when learning class material, referring to Gen Ed courses specifically.
- I felt that all of the general education classes that I took online were presented very poorly. In most cases, they consisted of YouTube videos with no interaction with the actual instructor.
- I have been cyber schooled since I was 11, so I understood how to use D2L a little bit, but even now as I approach the end of the year it is still hard for me to use at times. Sometimes assignments won't even appear for me in my content tab, so I have to rely on other ways of accessing my class work for the week. D2L was also not very easy to navigate for me as someone who has been in cyber school for almost 7 years.
