<ul style="list-style-type: none"> • I think the AMT program is kind of wasteful, I feel like the first 2 semesters would be great for an Industrial Maintenance type of degree. I feel the AMT should get more time in the CNC/G-M code and be expanded to include both subtractive and additive forms of manufacture. I feel it should also include more reverse engineering technology, like laser scanning tools that are the new hot ticket in the manufacturing market. The course so far feels very scattered because how the education is all over the map, like it's over generalized, a hammer when you want a scalpel. • personally the welding teachers have taught me everything possible about welding. we have done tons of work and testing to prepare us for working in either shops, fields, anything welders would have to do. • N/A • I would have liked to have known where my classes were located ahead of the first day of class. Many of my classes were off campus my first year.
