CARPENTRY & CABINETMAKING TECHNOLOGY

PROGRAM OBJECTIVE

The Carpentry & Cabinetmaking Technology program prepares students as entry-level trades people in the layout, estimation, and construction of residential construction including the installation of trim, furniture, stairs and cabinets. The skill set would also include weatherization installers and technicians and conservation retrofitters. Leadership and management skills are stressed. Students work with industry standard tools and equipment such as table saws, jointers, power tools, hand tools, pneumatic nailers, and laser levels.

READY. SET. WORK.

- Goal 1:** The carpentry and cabinet making program will prepare the graduate for entry level employment in a variety of fields of construction.
- Goal 2:** The program will cover residential construction from the "ground to the clouds" and does so with an emphasis on safety first.
- Goal 3:** The graduate will examine the pre-planning phases of construction through the sale of the structure and apply sound customer relation practices.

Applicants are encouraged to arrange a campus visit and a personal information session with a Recruitment Advisor. Appointments may also be made to meet with appropriate faculty and current students.

CAREER OPPORTUNITIES

Graduates work as rough and finish carpenters, cabinetmakers, mill workers, building product representatives, and custom woodworkers.

Typical employers in the carpentry and cabinetmaking career field are residential, commercial, and industrial construction companies; remodeling contractors; cabinet and showcase manufacturers; mill-work companies and lumber yards; wholesale and retail building product suppliers; modular home manufacturers; large institutional, business, and industrial complexes; and architectural engineering firms.

PROGRAM COURSES

CREDITS

TERM 1
