### **COMPUTER INFORMATION TECHNOLOGY**

#### **PROGRAM OBJECTIVE**

The Computer Information Technology Program prepares students as entry-level technicians for the maintenance, repair, and troubleshooting of the hardware and software used in today's local and wide area computer networking and information systems.

#### **READY. SET. WORK.**

- **Goal 1:** Graduates will possess the appropriate skills needed for entering the Computer Information Technology field.
- **Goal 2:** Graduates will learn the importance of good communications skills with all areas of a project.
- Goal 3: Graduates will develop critical thinking skills for troubleshooting various hardware and software issues.

Applicants are encouraged to arrange a campus visit and a personal information session with a Recruitment Advisor. Appointments may also be made to meet with appropriate faculty and current students.

#### **CAREER OPPORTUNITIES**

Typical employers are any business or industry using information technology today. Some examples of these are banks, hospitals, educational institutions, government facilities, mail order facilities, retail chains, school districts, and manufacturing facilities. Students work with current industry standard computers, and computer networks.
