ELECTRICAL CONSTRUCTION TECHNOLOGY

ASSOCIATE OF APPLIED SCIENCE DEGREE

PROGRAM OBJECTIVE

The Electrical Construction Technology program prepares students as entry-level technicians for the operation, inspection, installation, calibration, repair, maintenance and safety of residential and commercial electrical equipment.

READY. SET. WORK.

- Goal 1:** The graduate will be prepared as an entry-level technician in the electrical construction and maintenance industry.
- Goal 2:** Graduates will demonstrate safe electrical practices and understand how important they are in the electrical environment.
- Goal 3:** Graduates will acquire a foundation of education and skills for career advancement and lifelong learning.

Applicants are encouraged to arrange a campus visit and a personal information session with a Recruitment Advisor. Appointments may also be made to meet with appropriate faculty and current students.

CAREER OPPORTUNITIES

Graduates work as residential and commercial electricians, industrial engineering technicians in production environments. Graduates will also be prepared as quality assurance technicians, linemen or technicians for the power industry. Typical employers in the electrical field are telecommunications companies, utilities, Union and Non-union electrical companies and manufacturing companies.
